

Kirsty Lane

SEMH Practitioner

My Job

The Social, Emotional, Mental Health Support Team (SEMH) have a remit to support children & young people in schools, further education provision, and local authority pre-school settings.

It provides support for young people, families and staff within educational settings and aims to offer support at the earliest opportunity and reduce exclusions.

What I might do in school

I will visit school and work 1:1 with children and young people. I can also work with small groups or classes. When a child or young person is not responding to the support put in place by the educational setting and further specialist advice is required.

What is important to me...

My family. 😊
